

## ◆ Situation:

- ◆ BlueScope Steel's Port Kembla Steelworks ('BlueScope') is Australia's largest manufacturer and supplier of flat steel.
- ◆ Prior to implementing EzySolutions BlueScope had a budget timetable which stretched over a number of months and had a multitude of manual data input entries. They were also being pressured to look at ways to reduce the time taken to get the process completed, while maintaining the integrity of the data.

## ◆ Action:

- ◆ Investigations and testing found that BlueScope would be able to benefit from using EzySolutions.

## ◆ Outcome:

- ◆ "It is difficult to quantify the actual savings since starting to use EzySolutions, but we have been able to significantly reduce the time taken to input all of the Budget data, while being confident that the input is correct - time which can now be spent on analysis, rather than input. The users have also commented that the hours spent at work during the Budget process has also reduced.
- ◆ Whenever there have been upgrades or enhancements to the system or we have encountered problems, the support and advice we get from the team at EzySolutions is great - always prompt, always reliable, always able to be resolved.
- ◆ We plan to continue using EzySolutions for the foreseeable future."
